i.2® Series RESTORATION HARDWARE

RESTORATION HARDWARE

i.2® Restoration Door Hardware is a High Quality, High End design hardware reproduction product line exclusive to Independence2, LLC. Every effort is taken to achieve the greatest detail and design match to existing historical hardware as well as cutting edge, new construction interior design. Working in conjunction with an Italy-based design firm, we provide a wide array of options and finishes including 24k gold plating, solid forged brass, and heavy duty cast iron. Contact your local i.2® representative for more information.

Pricing and Availability is dependent upon each individual project's design requirements. A sales quote will be provided upon request.

All products are non-stock, special order and require a standard lead time for production.
